Re: Lost Horse Quarry

Sir:

I have just moved here + one of the reasons I chose Lost Horse area is the quiet atmosphere, fishing, wild life. Now you want to change all of this. do you have any Idea what will happen when those trucks start moving? not even saying what the effect the plant will be. no I don't think so. the sound of a jake brake when close to a horse - dangerous, safety of hikers, bike riders, the many people who walk for health + walk their pet. I have been around big riggs quite alot, the speed limit is just an ~~[illegible]~~ hindrance to their livelyhood, one way or the other. I don't blam them, It's just a danger ous situation in my exp-erience + Opinion.

I hope you can read my writting you can see why I don't write by hand any more.

Thank You
JoAnn Sprague
